EDUCATION

Queen's University

Bachelor of Computing (Honours) in Computing, Specialization in Software Design

Kingston, ON

Sep. 2023 – June 2027

Bur Oak Secondary School

Ontario Secondary School Diploma

Markham, ON

Sep. 2021 – June 2023

EXPERIENCE

Teaching Assistant

Stephen J. R. Smith Faculty of Engineering and Applied Science at Queen's University

Sep 2025 – Dec 2025

Kingston, ON

- Supported delivery of APSC 141 (Introduction to Computer Programming) for 750+ first-year engineering students.
- Led lab sessions teaching foundational C programming concepts, including loops, conditionals, functions, and data structures.
- Graded assignments, quizzes, and exams to ensure alignment with course learning outcomes.

PROJECTS

Movie Industry Data Analysis | *Python, Pandas, NumPy, Matplotlib, Seaborn*

- * Analyzed a dataset of 6,800+ films (1986–2016) scraped from IMDb to identify trends in revenue, ratings, genres, and budgets.
- * Performed data cleaning, exploratory data analysis, and correlation analysis using Python libraries.
- * Created visualizations to evaluate factors influencing movie success, including genre, budget, user ratings, and release year.

E-commerce Customer Spending Analysis | *Python, Pandas, NumPy, Seaborn, Scikit-learn*

- * Built a linear regression model to predict yearly customer spending based on app usage, website usage, session length, and membership duration.
- * Performed data cleaning, exploratory analysis, and visualization to uncover key spending drivers and platform insights.
- * Found membership length and mobile app usage to be the strongest predictors, providing actionable recommendations for business strategy.

Boston Housing Price Prediction | *Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn*

- * Developed a Random Forest model to predict median housing prices in Boston suburbs using 13 key features.
- * Performed data preprocessing, scaling, and handled missing values to prepare the dataset for modeling.
- * Compared bootstrapped and non-bootstrapped models, achieving higher R^2 and improved generalization, while analyzing feature importance to inform investment insights.

CERTIFICATIONS & TECHNICAL SKILLS

CS50: Introduction to Programming with Python, Harvard University (Online)

Nov 2024

Skills: Python, Problem Solving, Algorithms, Data Structures

Complete Data Science Bootcamp 2024, 365 Careers (Online)

Dec 2024

Skills: Python, Statistics, Machine Learning, Deep Learning (TensorFlow), Data Visualization, Pandas
NumPy, Matplotlib, Scikit-learn

AWS Certified Cloud Practitioner, Amazon Web Services (Online, Projected)

Apr 2026

Skills: AWS Cloud Fundamentals, Core Services (EC2, S3, RDS, Lambda), Cloud Security & Compliance, Cost Management & Billing, Cloud Architecture Basics
